Whitepaper
V-1.0

Introduction

BITLIVE is a DeFi crypto-currency Token that is hosted on BSC Scan Blockchain - BEP 20 . BITLIVE has a substantial Ecosystem around which includes Launchpad, Swap Exchange, Defi Ecosystem, NFT Marketplace, Gamefi, Exchange, utility and many other components to make the BITLIVE Network more efficient. So, BITLIVE is the most important part of the BITLIVE ecosystem.
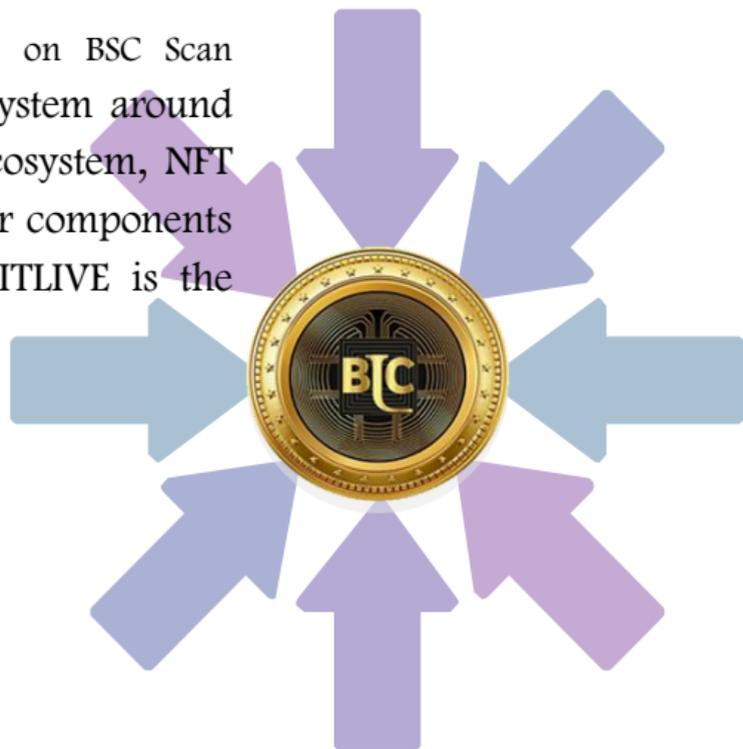

VISION

The primary goal of BITLIVE (ticker: BLC) is to maximize the benefits of blockchain technology by introducing Non-Fungible Tokens, incentivizing holders, and developing decentralized and centralized trading platforms. As a result, by creating a smooth, balanced, and robust ecosystem, users will be able to seamlessly move between different blockchain spheres within one forum.

MISSION

To try on unlocking BITLIVE potential and making BITLIVE easy to use.

To make BITLIVE market place with global reach.

To provide attention to the financial profits and safety of every single stakeholder.

To facilitate the ability of buyer-seller to transact a wallet in the most secure way.
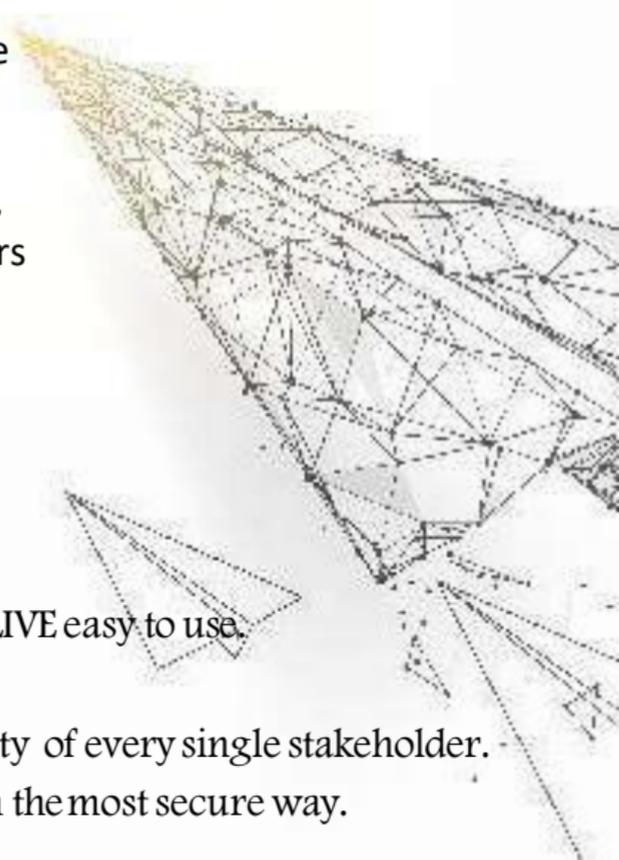

Benefits of B S C Scan (Blockchain)

Transactions on the BSC Scan Blockchain technology at Very Less Cost. BSC Scan does not impose a fee for asset transfers. It assists sellers and buyers through its free transactions, promotes, and provides the optimal business environment. Rapid transactions The network can handle up to 2000 transactions per second. Scalability and the potential to revolutionize online media are encouraged by such transactional capacity. This is a major accomplishment compared to Ethereum (25 transactions) or BITLIVE (3-6 transactions). Creates dApps On the network, you can create dApps. You can earn digital assets by creating a dApp on the network and offering content on it. These can be in regular BSC Scan you created BSC Scan backs that. As a result, you may be compensated for your efforts in developing the app and its content. If you don't want to create your own dApps, you can still browse through the vast collection already created.

Safe

BITLIVE has a solid reputation in the cryptocurrency world. The amount of money spent by the company on security and the personnel it has hired demonstrates this. As with other cryptocurrencies, because it is a decentralized network, the individual bears a significant responsibility for safeguarding their CRYPTOs. In terms of the network as a whole, there has yet to be a security breach.

Proof of stake

Seeing as cryptocurrencies are decentralized and not controlled by banks, they require a way to verify transactions. Proof of stake is a popular method (PoS). Proof of stake is a consensus mechanism for cryptocurrencies. By staking their cryptos, cryptocurrency owners can check new transactions and add them to the Blockchain. This method replaces proof of work, the first cryptocurrency consensus mechanism. Proof of stake has grown in popularity as concerns about the environmental impact of crypto mining have grown. Proof of stake is critical for cryptocurrency investors. These are some examples of cryptocurrencies that use it. Owners of a cryptocurrency can stake cryptos and create their own validator nodes using the proof-of-stake model. Staking is the act of pledging your cryptos to be used for transaction verification. They are locked while you stake your cryptos, but you can unstack them if you want to trade them. When a block of transactions is ready to be processed, the proof-ofstake protocol for the cryptocurrency selects a validator node to review the block. The validator verifies the accuracy of the block's transactions. If this is the case, they add the block to the Blockchain and receive cryptocurrency as a reward for their efforts. If a validator proposes adding a block with incorrect information, they will be penalized by losing some of their staked holdings.

➡ **W h y BITLIVE** ?

Zero Human Factor :-

The human factor is not taken into consideration. The smart contract is not dependent on anyone, and there is no way to prevent the platform from functioning.

Decentralization :-

Instead of having managers or administrators in charge, there are only creators who are members of the community on the platform, just like everyone else.

Instant Transactions :-

Profits earned by other members are transferred directly into your personal wallet. There is no hoarding in the system, and all of your earnings are yours to keep.

Transparency and Anonymity :-
Because the smart contract code is public, anyone can view the complete history of all transactions. This ensures that the conditions are pure and that the platform statistics are accurate.

Charity

Digital fundraising may also benefit from Blockchain, as charities can receive contributions in a safe, transparent, and worldwide manner without having to pay currency exchange commissions. Donations to charitable organizations on BITLIVE will be accepted, and they will be handled securely and transparently for the benefit of those who make them.

Bonus

You can earn money in BITLIVE by opening new accounts with certain financial institutions and participating in the digital CRYPTO-based economy supported by bonuses. These bonuses will not end here; instead, you will be able to earn from various other offers based on your investment and profit.
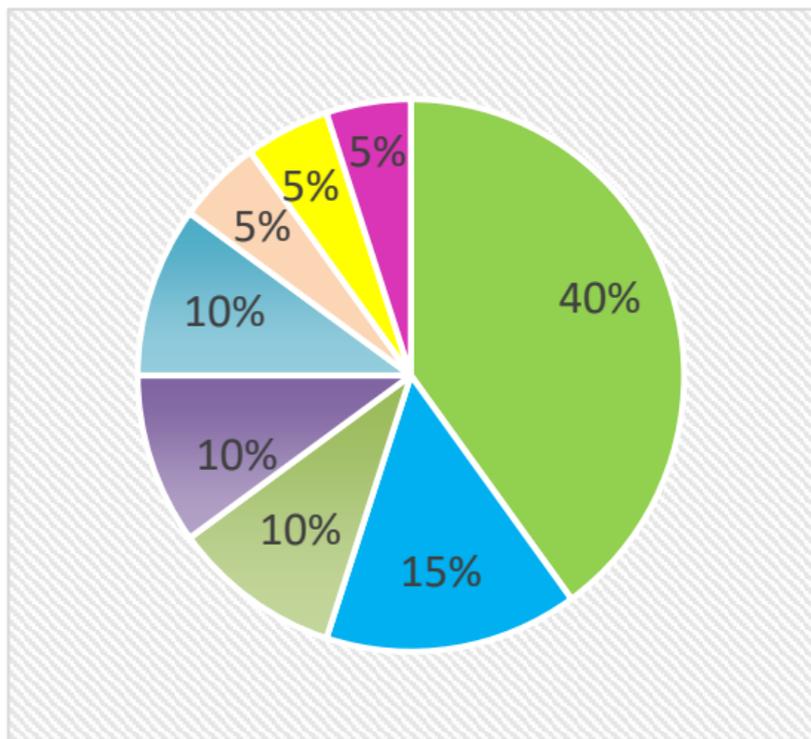

Allocation of BITLIVE

Name	BITLIVE
Short Name	BLC
Maximum Supply	10,00,000
Technology Stack	BEP-20

Smart Contract Address :
0x64e3d86998758cdc6b1f316583e3e13fef9dc4d8

CRYPTO Distribution

- Community — 40%
- Marketing — 15%
- Airdrops — 10%
- Blockchain — 10%
- Exchange — 10%
- Meta & Gaming Project — 5%
- Charity — 5%
- Development & Advisory Board — 5%

Roadmap

Q3 2023
Whitepaper
we will provide statistics diagrams & facts by using Whitepaper So that interested investors can get important information.
Staking program launch
For CRYPTO holders,it is a way of earning rewards by staking BITLIVE
Listing on secure platforms like pancake swap,

Q4 2023
1.   Listing on CoinMarketCap & CoinGecko Processing
2.   Listing on CoinsBIT / Cryptoforce (https://cryptoforce.in/) Processing
3.   Listing on AZBIT Exchange (https://azbit.com/) in December 2023
4.   Listing on PanCakeSwap in 2023

Q1 2024
IDO,IGO & NFT
1. We will launch IDO ,IGO & NFT launchpad for launching new CRYPTOs, crypto projects, and raising liquidity.
2. BITLIVE SWAP
Using this user can swap and operate their CRYPTO very easily & get rewards for every swap.
3. Listing Completed on CoinMarketCap & CoinGecko in January 2024

Roadmap

Q2 2024
1. NFT marketplace
This will help user to Buy & Sell their unique digital assets.
2. Blindbox Sell
Our first game NFT Blindbox will introduce for sell.
3. NFT staking program
For NFT holders,it is a way of earning rewards for holding NFT.
4. BITLIVE Gaming Platform
Here more excitement will come to BITLIVE community & play to earn game will start.

Q3 2024
1. New Road Map Will provide by BITLIVE including Trading exchange, Freelance platform, BITLIVE Own Exchange, Metalending Platform , BITLIVE Blockchain & many more project.
2. Listing on ByBit, Binance .
3. Solar Charging Station implementation will be the First Step to enhance the Green Energy for a better Future of Mankind.

Gaming Industry In

the year 2022, a pandemic-stricken world turned to games to get through the difficult times. In-game accessories brought in billions of dollars for many top gaming companies in 2022 and 2023. The gaming industry was worth US 1 Million in 2022; Trans Perfect and many other global institutions believe that by 2024, it will have doubled to US 100 Million.

The transaction process will be sped up by selling fungible items for cryptocurrencies, and players will be able to sell their in-game fungible items for cash on the market.

Playing the games on a regular basis allows players to accumulate assets that they can trade with other players using NFTs. Players could gain more tokens as a result of their gaming experience and use them to buy better tools to help them improve their skills.

2024

2022

US 1 Million

US 100 Million
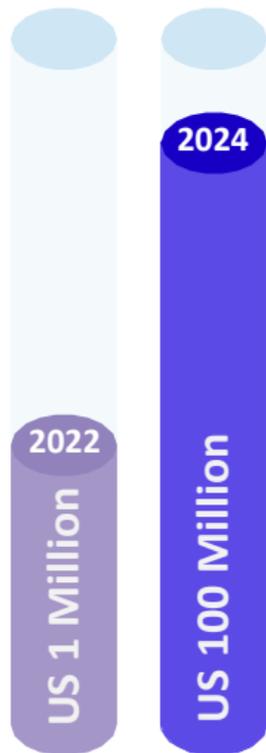

Metaverse

Metaverse is a virtual universe that contains augmented reality and the entire internet. In the Metaverse universe, the participants will be able to shop from a boutique on the Champs-Elysees street, experience exotic cars, make touristic trips globally and they will be able to participate in the video games as a video game character

Via Metaverse, which is described as the next mega step of the internet, everything will be the same as the truth and even more because the control will be in the hands of the user. The participant can participate in races, organize a party or play video games with his friends, in short, he will be able to experience instant human desires, hobbies and pleasures in this cyber universe that will be essential in the daily life of Smart Cities and their inhabitants.
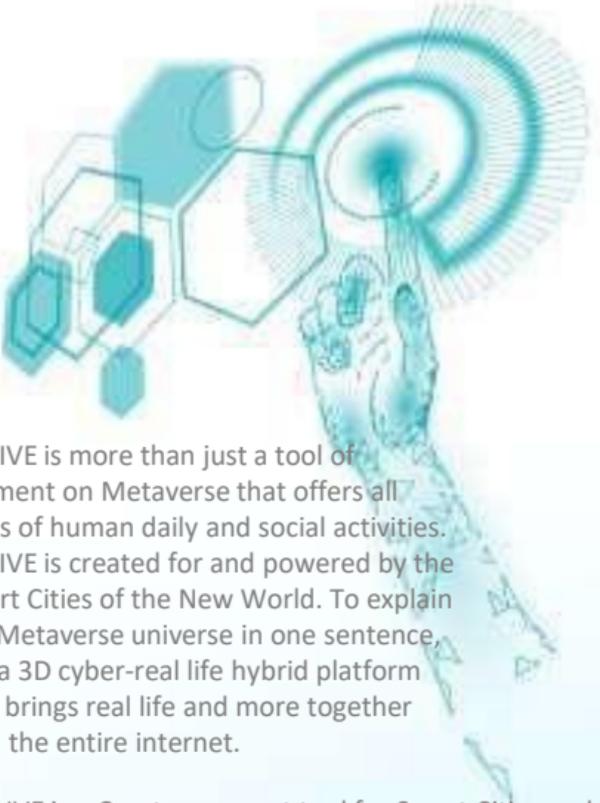

BITLIVE is more than just a tool of payment on Metaverse that offers all kinds of human daily and social activities. BITLIVE is created for and powered by the Smart Cities of the New World. To explain the Metaverse universe in one sentence, it is a 3D cyber-real life hybrid platform that brings real life and more together with the entire internet.

BITLIVE is a Crypto payment tool for Smart Cities and their residents at Metaverse events and organizations. As BITLIVE , we attach importance to the Metaverse and plan to prepare surprises for BITLIVE Holders for payments made with BITLIVE (BLC) on this new universe.

Community and Ecosystem

The BITLIVE ecosystem comprises the following key components:

1. Staking and Locking:

To incentivize early supporters, we have introduced a staking and locking feature, providing holders with a highly effective way to earn more BITLIVE.

2. BITLIVE Swap:

BITLIVE Swap is a cross-chain decentralized exchange protocol based on the AMM mechanism. It allows users to exchange different types of cryptocurrencies within their decentralized wallets and earn transaction fees by providing liquidity.

3. BITLIVE NFT:

BITLIVE will launch NFTs based on diverse cat avatar concepts, enabling holders to participate in DAO and community governance.

4. BITLIVE LOTTO:

With an innovative and provably fair blockchain drawing mechanism, BITLIVE AI Lottery offers exciting gameplay and substantial lottery prizes.

5. BITLIVE DAO (Coming Soon):

In order to decentralize leadership and foster community participation, BITLIVE plans to distribute decision- making authority across various committees and task forces, focusing on areas such as social media presence, charity initiatives, blockchain development, and crypto education.

6. BITLIVE AI Education (Coming Soon):

By leveraging the CHATGPT kernel, we are developing BITLIVE AI Education, an intelligent AI pet cat with voice interactions, focusing on children's education and knowledge transfer.
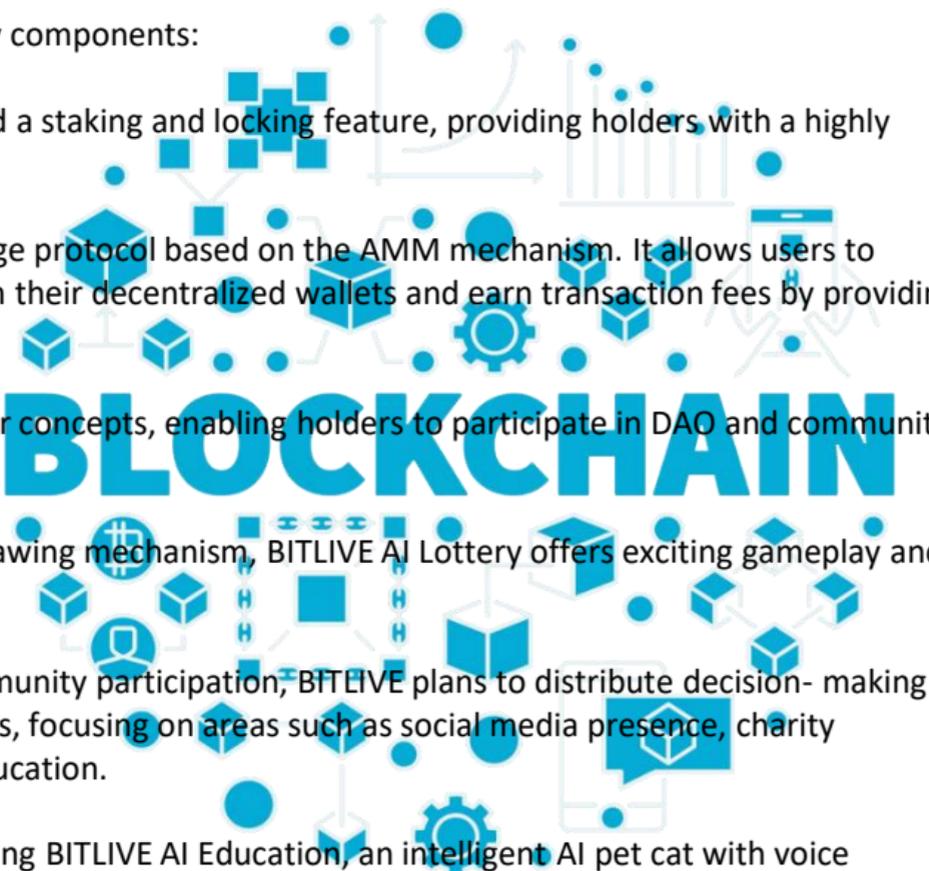

Risk Disclaimer

Before investing in and participating in the BITLIVE project, please consider the following risk factors:

1. Market Risk : The cryptocurrency market is highly volatile and unpredictable. CRYPTO prices can be influenced by various factors, including market demand, competition, regulatory changes, and more. Investors should carefully assess the risks and make decisions based on their risk tolerance.

2. Technology Risk : Blockchain technology carries certain technological risks, including but not limited to network attacks, smart contract vulnerabilities, and security issues. We will implement appropriate security measures to protect BITLIVE's technical infrastructure, but risks cannot be completely eliminated.

3.Legal and Compliance Risk : The cryptocurrency industry is subject to regulatory oversight in different countries, posing compliance risks. We will collaborate with legal experts, comply with applicable laws and regulations, and strive to ensure the compliance of the BITLIVE project. However, the legal environment can change at any time, which may impact the project.

4. Execution Risk : Despite our best efforts to drive the implementation of the BITLIVE project, there are still execution risks. The project's success relies on the team's capabilities, market acceptance, and other factors. Investors should acknowledge that various challenges and uncertainties may arise during the project execution process.

5. Crowdfunding Risk : BITLIVE's issuance and distribution will be conducted through crowdfunding. Investors may face risks during the crowdfunding process, including but not limited to fund security and the project's inability to meet expected goals. Investors should carefully assess the investment amount and understand the associated risks.

The above risk factors serve as examples, and actual risk factors may be more complex and diverse. Investors should independently evaluate the risks before participating in the BITLIVE project and make informed decisions based on their own circumstances.
